

DATA SHEET

Sensor housing for Humidity- and Temperature probes Ø 12 x 70 mm

Description

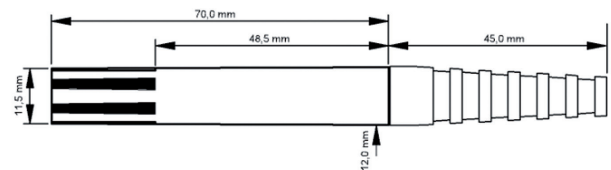

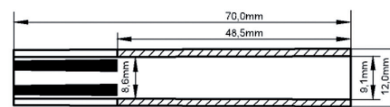

Features

- Optimal sensor protection
- ABS plastic
- Application temperature -40... 80 °C

Areas of application

- Assembly of an SMD-circuit board

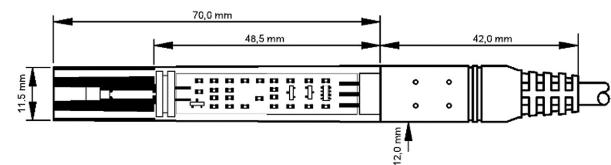

Technical Data

Sensor housing H192 0007	
Material	ABS plastic, Black
Dimensions	Outer- Ø 12.0 mm
	Inner-Ø 9.1 mm
	Length 70 mm, (115 mm with nozzle)
Temperature range	- 40..80 °C.
Scope of Delivery	Scope of supply inclusive of cable gland with tapered inlet and flexible breakage protection nozzle.
Article number	H192 0007

Application

Universal plastic housing for assembly of temperature or humidity probes. The functional housing offers optimum protection to the sensor for various application areas.

Further accessories like wire mesh, membrane filters and also special connection cable with tinned pins for direct assembly of circuit board are available on request!
